Who can use Runnymede Footcare Centre?

Although our clinic is located inside Runnymede Healthcare Centre and services the patients of the hospital, we are also open to families, friends and the general community public.

To become a patient of the Runnymede Footcare Centre:

To become a patient of the Runnymede Footcare Centre and to receive treatments, please fill out the new patient form and consent form. Once received, we will schedule you or your loved one in for a treatment on our next rotation to the hospital.

You can also call us at: 416-253-6400 (please indicate this is for Runnymede Footcare Centre).
About our chiropodist:

**Paul A. Scotti**,  B.Sc Podiatry, C. Ped, D. Ch

The founder of the company is Paul Scotti, B.Sc. Podiatry, C.Ped, D.Ch. Paul’s experience and education started in 1986 when he studied massage therapy at the Sutherland-Chan School of Massage Therapy in Toronto. He then continued his education studying at the Kikkawa College of Massage Therapy and Shiatsu in Toronto and at the Sarasota School of Massage Therapy in Florida. He received his certification through the National Certification Board of Massage Therapy and Bodyworks.

His education continued in the field of biomechanics and orthotics and worked for a variety of orthotic labs. He is now a member of the Pedorthic Association of Canada and has earned accreditation as a Certified Pedorthist (C.Ped) from the Canadian Pedorthic Certification Board. Paul then furthered his studies at The Michener Institute of Applied Health Sciences (Toronto) where he completed the Chiropody program and is now a Registered Chiropodist (D.Ch) with the College of Chiropodists of Ontario. Paul is the only known Registered Chiropodist or Podiatrist who is also a Certified Pedorthist in all of Canada. This gives Paul a unique and unparalleled experience that he brings to the clinic. For this reason, all the custom orthotics are manufactured onsite by Paul himself.

Paul received his Bachelor of Science degree in **Podiatric Medicine** (B.Sc. Podiatry) from Queen Margaret University, Scotland.

He is a Certified Fitter for Medical Compression Legwear, and trained in custom knee brace casting and fitting.

“He who is theoretic as well as practical is therefore doubly armed; able to prove the propriety of his designs, but equally so to carry them into execution”  Vitruvius, c27BC
